Carbon Neutral, Colorful, Comfortable.

There are a variety of elements that make Swurve a soft and structural addition to any boardroom, from its sleek cast aluminum arms, to its expansive color palette, to its ergonomic knit back. And as the first Keilhauer product that is completely carbon neutral, it checks all the boxes in the office chair department.

**A Sustainable Solution**
When designing Swurve, we’ve eliminated carbon emissions at every turn by sustainably sourcing materials, responsibly manufacturing all elements of the chair, and offering breakdown and recycling directions. Where carbon emissions remain (such as during the transportation process) Keilhauer has offset the effects by investing in carbon emission and climate change mitigation projects. Every Swurve sold will produce net-zero carbon emissions.

**Naturally Colorful**
From neutrals to bold hues taken from nature, Swurve’s expansive color offering makes it highly versatile. Available in 22 different mesh colors, Swurve can be customized to complement any palette, tone, or use. It is also offered in vinyl upholstery for environments that have increased sanitization needs.

**Armed for Style and Comfort**
The Swurve design is defined by a graceful, swooping arm that subtly twists as if it has organically grown from the chair’s body. Each arm also includes a cap that creates a bumper to protect table edges and is gently sloped so arms tuck neatly under tables without contact. Swurve’s comfortable seat leverages Keilhauer’s patented syncro-tilt mechanism to provide smooth movement when leaning or moving. And with an ergonomic knit back, the chair has a uniquely light feel.
Swurve 79101
Mid channel back office chair, upholstered in Selva Night Black, 5-star aluminum base
