**Tool Required**
- Hex Allen Key
- Phillips Driver

**Hardware Included**
- 1/4-20 x 3/4"
- Hex button head cap screw (x32)

---

**Buncha Non - Powered Assembly Instructions**

1. Place the table top upside down on a blanket.

2. Using the hex key, fasten the four legs with 1/4-20 x 3/4" Hex button head cap screw (x32).

3. Proceed to flip the table top into its final position.
Buncha with Power Assembly Instructions

1. Place the table top upside down on a blanket.

Power Leg (x1)

1) This leg includes a channel for the power cable. Ensure this leg is fastened to the corner nearest the power outlet source.

2) Using the hex key, fasten the four legs with 1/4 - 20 x 3/4” Hex button head cap screw (x32).

3. Place the table on its edge on a blanket.

1) Insert the power box and feed the power cable through the table cut-out.

2) Slide the Mini Tap clamp bar into the slot, then fasten with the Mini Tap thumb screw (x2) until tight.

4. Place the table upside down on a blanket. Remove the channel leg cover off the power leg, and proceed to set the power cable into the channel leg.
Place the channel leg cover over the channel leg. Firmly press on the cover to ensure it is set in place and sits flush with the leg.

Unpackage the adhesive tabs with velcro (x2) that accompany the control box, then proceed to place them on the underside of control box.

Connect control box cord to daisy chain connection.

Place self adhesive cable management clip (x1) at the location above.

Fasten control box to underside of table at the location above. Feed cable through cable management clip.

Place the velcro loops (x4) at the locations above.
Place (x1) self adhesive cable management clip at the location above.

Feed the ganging plug cable through the cable management clip (x1).

Place (x1) velcro hook on the underside of the ganging plug.

If the table is not being daisy chained to another table, the ganging plug can be fastened to the velcro loop at the location above. If the table is being daisy chained to another ganged table, instead fasten the ganging plug to one of the (x3) velcro loops closest to the side which the table is ganged.

In order to link the power connection between multiple tables, only one table requires the power leg. All additional tables (maximum of x7) can be powered by using the daisy chain extension piece above (Short cord).

Flip over and place the table in its final position.

**Power Linking Buncha Tables**

**EXTREME HAZARD WARNING:**

IN ORDER TO PREVENT ELECTRICAL DAMAGE AND/OR FIRE, A MAXIMUM OF (x8) TABLES CAN BE POWER LINKED TOGETHER.

</table>

1. Locate the two pilot holes located at each end of the underside of the table. With the Phillips driver, fasten the ganging mechanism to each end of the table using (x2) 1/4 - 20 x 3/4” screw.

2. Ensure table edges are aligned and level with each other prior to ganging.

3. Rotate the Male Component B on each table until it clicks into Female component A (See Figure 1 & 2).
Modesty Panel Assembly Instructions

Hardware Included for Modesty Panel

1) Slide the modesty screen onto the table legs.

2) Insert the modesty panel clips onto the top edge of the modesty panel, then proceed clip them into the pilot holes on the underside of the table top.

When installing the modesty panel, ensure the folded fabric seam circled above is facing inwards.

3)

Flip over and place the table in its final position.

Place the table on its edge on a blanket.
